

Hi this side Adil

---

I was only a witness in a sale deed. I came to Saudi Arabia for employment on 17 November 2024. In May 2025, when I submitted my passport for renewal, my police clearance failed. After researching, I found that a court case is pending against me. I checked myself using the case number and found my name in a land dispute case where I was listed as a witness.

I contacted my friend to ask what this was about. He said it is a false case and that they would never commit such fraud. I had no knowledge of this matter. I became a witness unknowingly because I used to visit him, and after my bladder surgery, he used to take me to the hospital, which is why I was unable to refuse being a witness.

Secondly, I never met any investigating officer, and I do not know how the charge sheet was filed. We are simple, honest people who came abroad for work. The allegations mention an incident dated 16th (2024), where it is claimed there were threats, but I was not present at that place. I was in Delhi for GAMCA medical at that time.

My first priority is resolving the passport and job issue. I do not want any action against anyone, especially my friend's sister, as she is the main accused in this matter.

When I spoke to my friend, he hid the truth and said he had included his brother instead, who has the same name as me, and even the father's name is also similar. I have not done any fraud, not even 1%. I became a witness unknowingly.
